

# Bryan Hornsby

## SUMMARY

8 years in high volume logistics with a reputation for reliability and analytical problem solving. Now building and operating local AI systems and automation tooling across Linux, Docker, Python, and local LLMs. Primarily seeking IT/help desk roles where I can apply operational discipline and hands on technical ability to real problems.

## SKILLS

- AI & Automation: Ollama, llama.cpp, RAG pipelines, local LLM deployment, GPU/CUDA configuration
- Infrastructure: Docker, WSL2, SSH key management, Tailscale, Syncthing
- Operating Systems: Windows 10/11, Linux (Ubuntu & CachyOS), MacOS
- Support & Troubleshooting: Systematic troubleshooting methodology, ERP workflows (Epicor, KDL), cross platform system maintenance (Windows, Linux, macOS), process documentation

## PROJECTS

### • Tw1n (AI Powered Second Brain) —

Built a digital second me + AI second brain using Hermes agent and Obsidian. Indexed 3,365+ conversations across Claude, ChatGPT, Grok, and Gemini; compiled Qwen3.6-35B-A3B via llama.cpp for local inference on RTX 3070.

### • Offline AI Helpdesk Assistant —

Built a fully offline, voice enabled helpdesk assistant powered by Phi-3 Mini, Whisper, and ChromaDB with RAG retrieval, running through Oobabooga on WSL2/CUDA (RTX 3070) with zero cloud dependency.

### • Operation Immortal Agent —

Converted an autonomous Solana agent framework for Meteora DLMM liquidity management and swap fee revenue into a documented skill, with plans to explore execution further.

## PROFESSIONAL EXPERIENCE

### Amphenol TPC Wire & Cable | Macedonia, OH — Warehouse Specialist

May 2022 - June 2025

- Managed end to end order lifecycle: picking, cutting, wrapping, scheduling shipments, staging outbound skids while also supporting inventory and receiving operations as needed.
- Streamlined Epicor and KDL ERP workflows by identifying and resolving bottlenecks improving order processing accuracy and reducing system latency.
- Optimized daily operations and equipment usage under tight deadlines, maintaining a 98% OTIF rating on a consistent basis.
- Maintained cable inventory with strict lot trace requirements, ensuring correct gauge, shielding, and connector specs were picked and verified before cutting and shipping.

### ASW Global | Mogadore, OH — Material Handler

February 2020 - May 2022

- Managed high volume order fulfillment and outbound shipping for industrial and consumer goods, ensuring safe handling of bulk products.
- Operated RF scanners and ERP systems for real time inventory tracking with accurate digital records, resolving order discrepancies while maintaining high accuracy
- Collaborated with team members to meet high pressure shipping deadlines and maintain a consistent workflow.
- Conducted cycle counts in high rack storage using warehouse equipment, surfacing inventory discrepancies before they impacted shipping accuracy.

### Spectrum Diversified | Twinsburg, OH — Various Positions

June 2018 - January 2020

- Progressed from entry level production line work to warehouse operations, taking on expanding responsibilities across order picking, shipping scheduling, and facility expansion.
- Supported ERP system implementation during a major warehouse expansion, managing data entry workflows and ensuring data integrity during the transition.
- Operated reach trucks and cherry pickers in a high volume environment, maintaining safety and efficiency in daily picking and storage operations
- Processed inbound shipments and verified order paperwork against delivery documentation before staging items to assigned storage locations.
